[1] For the seven instrument teams (ACRIM, AMSR,EOSP, HIRDLS, MLS, SOLSTICE, and TES) for which processing information is not available, it was assumed there would be a one-to-one mapping between data processes and products, i.e., one process for one data product. The product information for these instruments is based on the June 1993 Product survey. Process IDs for these instruments are listed as "TBD".
